

Alert: Taylor Farms has issued a recall on raw onions

To Our Valued Customer Partners,

This is to advise you that Pacific Coast Fresh Company is **NOT** involved with the recent Taylor Farms recall of raw onions. Please see the links and QR Code below for additional recall information.

Taylor Farms has issued a recall on raw onions after preliminary data from the U.S. Food and Drug Administration indicated the ingredient as "a likely source of contamination" in a deadly E. coli outbreak linked to McDonald's.

Currently the recall is affecting only US Foods distribution. However, that may change as more information becomes available.

This recall is in connection with the ongoing FDA outbreak investigation of E. coli O157:H7 illnesses at select McDonald's locations.
